

MiNDCAN Quote+™ is a quote management tool that allows you to stick to your own quoting template while consolidating information in one system, improving reporting capabilities, and saving time through automated functionalities. By transforming your quoting process from complicated spreadsheet collections to a single repository of information, the system enables better insights and faster quoting.

MiNDCAN Quote+™ helps you to:

- Track all versions and progress in one system, without having to move away from tracking in spreadsheets.
- Utilize what-if analysis to create different scenarios with ease.
- Develop templates in the system to quote faster and more consistently.
- Consolidate supplier quotes into one system.
- Create rules to manage workflows and alerts, making the system flexible to your needs.

Ready to get started?

Quote+™

Key Features:

Track progress and version history with end-to-end visibility.

Analyze changes across cells, tabs, or sections (value or formula-based).

Expression-based workflows for automated approval requests and notifications.

Utilize what-if analysis to test different scenarios for a quote.

Manage supporting documents within a single repository.

Supplier eco-system management

Manage master templates across stakeholders, in a single source.

Collaborate with different stakeholders on the same template.

Configure the system with master data management.

Make faster decisions with on-demand analytics.

Integrate real time with external systems, using API interface.
